

Incident dossier

INC-0001 · Northwind Aerial Services (demo) · UAS operator code: NLD-demo-0000000000 · Generated on 09/09/2026 17:52 (Europe/Amsterdam)

SUMMARY

Date & time	26/08/2026 11:57
Type	Technical failure
Severity	Minor
Status	Closed
Place	Saint-Priest, Lyon
Reported by	Alex Weber

Description: Battery cell voltage warning at 22 minutes into the flight, at 48 m AGL over the roof. Precautionary landing on the designated area, 40 s after the warning. No damage, no third parties involved. Battery withdrawn from service pending inspection.

Immediate actions: Return to home initiated manually; landing area cleared; battery labelled and isolated; second flight postponed to the following day.

CONSEQUENCES

Damage	None.
Injuries	No
Third parties involved	No

LINKED FLIGHT (LOGBOOK)

Take-off	26/08/2026 11:35:00
Landing	26/08/2026 12:09:00
Duration	00:34:00
Drone	Matrice 4T (DEMO-NW-M4T-0001)
Pilot	Alex Weber
VLOS	VLOS
Anomalies / defects / occurrences	—
Hash-chain fingerprint	69cd8dd7ff25de1e6b266d31d64e9e72c07f0f729833b3e4e18f3db97532cd7b

AIRCRAFT

Model	DJI Matrice 4T — Matrice 4T
Serial number	DEMO-NW-M4T-0001
CE class	C2 · 1200 g
Insurance expiry	09/04/2027
Firmware	—

PILOT & QUALIFICATIONS

Pilot	Alex Weber
Valid certificate at time of occurrence	YES

MISSION & CHECKLISTS

Title	MSN-0002 — Roof survey after hailstorm, logistics hub	
Weather at takeoff	Favourable (wind 7.3 km/h)	
CHECKLIST	SIGNED BY	SIGNED ON
Standard pre-flight	Alex Weber	09/09/2026 17:24

AUTHORITY REPORTING

Reportable to the authority	No
Authority reference / protocol	—

Integrity: the logbook entry is chained with a SHA-256 hash (tamper-evident) and each piece of evidence carries its own fingerprint. The attached ZIP contains the PDF, raw telemetry and evidence files for verification.
